What is slow, manual or unclear?

We get about 400 applications per open role. To save time, a recruiter pastes the CVs into a free online AI tool, which scores each candidate from 1 to 10. Everyone below 6 gets an automatic rejection email with no human review. We want to scale this to all open roles next quarter.

Your problem

The current method of using a free online AI tool for candidate scoring is not compliant with internal policies and regulations.

Fix it with an internal tool

Not allowed yet. Please use an approved external alternative.

Approved external alternative

Consider using Microsoft 365 Copilot, which is compliant with internal policies and regulations.

How others solve it

Many companies are implementing AI tools for candidate scoring that require human oversight to ensure compliance with regulations. These tools analyze resumes and provide insights while maintaining a human element in decision-making.

Is it allowed?

Compliance level is red. The use of unapproved tools for candidate scoring involves personal data and automated decisions regarding hiring, which requires Board and Works Council approval. Relevant rules include R1, R2, R3, R4, and R7.
