

FMP-3100 · Automating Weekly Team Updates

Reference: FMP-3100 | Department: Other | Date: 9 Nov 2026 | Confidence: High (83%)

Executive summary

The weekly update writing process can be automated to save time and ensure consistency.

Use case card

- Use case: Automating Weekly Team Updates
- Problem and frequency: Every Friday I write the weekly update for my team. I take an aggregated KPI table (contacts per category, average handling time, backlog size, with no names and no user IDs) and write about 150 words on trends, risks and one ask. It takes about an hour, and the tone is different every week. My team lead reads and approves the text before I post it in our team Slack channel. (Weekly)
- Internal answer: KAi Assist: Export the KPI sheet (aggregated, D2); Upload it in Analyse table; Ask for a short update with trends and risks.
- External answer: Microsoft 365 Copilot
- No internal solution: No
