

FMP-3108 · Candidate Scoring Compliance

Reference: FMP-3108 | Department: Other | Date: 9 Nov 2026 | Confidence: High (77%)

Executive summary

The current candidate scoring method is non-compliant and relies on an unapproved AI tool. A shift to a compliant solution is necessary for scalability.

Use case card

- Use case: Candidate Scoring Compliance
- Problem and frequency: We get about 400 applications per open role. To save time, a recruiter pastes the CVs into a free online AI tool, which scores each candidate from 1 to 10. Everyone below 6 gets an automatic rejection email with no human review. We want to scale this to all open roles next quarter. (Daily)
